

MAGNETIC LIFTER

CMK ELECTRO POWER PVT LTD.
(An ISO 9001:2015 Certified Company)

Chemical Industries

Crane Industries

Paper Industries

Automobile Industries

Power Plant

Manufacturer of EOT Crane Control Equipments

Our Customers :

Magnetic Lifters are mainly used to lift steel plates, blocks, press moulds, etc. and load / unload in machines during handling operation. They can hoist moving iron blocks and other magnetic material. They are easy to operate and safe to handle and hence are widely used as lifting devices in factories, docks, warehouses, and transportation industries. By using them, you can improve your working conditions and increase your working efficiency.

Features:

- Zero electricity required
- Forged hook for high mechanical strength and durability
- Precision machined assembly block in a single piece to enhance efficiency
- Designed for safety and lightweight
- Full proof locking system with an easy to use "on" and "off" lever
- 3 times rated capacity factor of safety to meet the safety standards as per international standards for under the hook devices
- Test certificate for safety factor from government-approved third party
- No Maintenance and Operating cost
- No damage to the workpiece being lifted
- Very Compact

Benefits:

- Lifting Magnets use space more effectively. Eliminates the need to gauge and increase stacking height
- As less as one operator can move large and heavy work-piece safely and easily using Magnetic Lifters
- Lifting Magnets save labor and time - improves productivity
